

Spring 2013 Tues 2-4:50 pm

# E140: Evolution and the Environment (4 units)

Instructor: Diane Campbell

- Meet once a week to evaluate a basic topic in ecology or evolution and its application
- Participate in hands-on study in the field and the classroom
- Apply your knowledge to conservation, global warming, agriculture, public health
- Designed for those with an interest in ecology and for anyone wanting to learn to read scientific articles, evaluate evidence, and write about science to help with other classes, grad school, and jobs

E106 prerequisite or co-requisite
